

Melle, 22 September 2021

To whom it may concern,

It is with pleasure that I write this letter in the support of the candidature of Prof. Marek Babjuk with whom I had the opportunity to cooperate for many years in the development of educational and training activities in the European Association of Urology and the European School of Urology. He has proven to be a visionary man with whom it is great to collaborate. Besides that, he is also a well-respected Urologist and skilled Surgeon.

It will be our pleasure to cooperate with your faculty in sharing experiences in surgical training. We both believe that the traditional training in surgery in general and robotic surgery specifically does not longer work. Together, we are working on a novel training methodology ("proficiency based progression") that ensures modern, standardised and safe training pathways that have proven to deliver surgeons at proficiency level with dramatic decrease of complication ratios.

I would appreciate his election as the dean of the 2nd Faculty of Medicine in Charles University. I strongly believe that it could help us to build fruitful cooperation between our institutions.

Sincerely,

Alexandre Mottrie
